Electric Commercial Vehicles - ECV

Kick-off 5.9.2012
Aalto-yliopiston Saha

ECV and the context of electrification

- Society, traffic, logistics and industry are all getting increasingly electrified in a multi-faceted way
- Finland has significant industry and other players in the entire value chain for electric commercial vehicles
- ECV is the most technology-oriented consortium of the Tekes EVE programme
- ECV constitutes an extensive R&D network and infrastructure offering also demonstration platforms

ECV – strategic outlook

- ECV offers extensive R&D and support for Finnish electric vehicle industry and electric mobility players
- Finland has a good chance to reach a leading position in heavy-duty commercial electric vehicles
- From strong subsystem research topics to integrated know-how
- Strong networking both in Finland and internationally
